Background

DEMOGRAPHIC BONUS AND INDONESIA EMAS 2045

=

Indonesia Emas 2045

Mengambil Peran adalah Tanggung Jawab Bersama

Program Objective

Utilizing the demographic bonus to improve the quality of human resources

The demographic bonus refers to a period in which the productive-age population (15–64 years old) is larger than the non-productive age population (65 years and above), with a proportion of more than

60% of Indonesia's total population.

This momentum must, of course, be addressed with thorough and strategic planning.
